

- 1 Customisable Labelling System: built-in LCE module** on the valve body made up of transparent protection plug and customisable tag holder using the LSE set (available as accessory). The customisation potential lets you **identify the valve on the system** according to specific needs
- 2 Optimised dynamic fluid design:** energy savings due to the improved valve Kv value and consequent reduced pressure drop

- 3 High surface finish ball shutter: reduced wear,** longer working life and reduced valve maintenance. Ideal to convey dirty fluids, even with suspended fluids or filaments, thanks to the special design that permits **internal valve selfcleaning**
- 4 Locked ball seat carrier:** safe dismantling for maintenance with the Easyfit multifunctional handle
- 5 Ideal for horizontal installations: perfect seal even with low back**

- pressure. Silent** and durable even with strong vibrations and pulsating fluid
- 6 PVC-U shutter and springs** available in STAINLESS Steel 316, A316 PTFE encapsulated: maximum reliability in a **wide field of applications** from salt water to aggressive acids
