

1 **PP-GR sealing bonnet** marked by **high construction strength**. The absence of metal parts exposed to the external environment prevents any risk of corrosion.

2 The special **sealing diaphragm** reinforced with textile fibres allows longer operation to be reached without showing any signs of wear.

3 **New valve body internal design**. **Substantially higher flow coefficient** and lower pressure drops. The degree of efficiency reached has also enabled the **size and weight of the valve to be reduced**.
