

1 Electric actuator constructed according to FIP specifications with plastic shell and standard emergency override. Available with voltages from 12 to 240V.

2 Rack & pinion type pneumatic actuator constructed according to FIP specifications: fully protected against weather corrosion

available in double-acting (DA) or simple-acting normally closed (NC) or normally open (NO) versions.

3 DUAL BLOCK® patented lock system that ensures union nut tightening hold even in severe conditions such as vibrations or heat dilation.

4 Double stem with double O-Rings for ball centring and operating torque reduction. The upper stem is also equipped with a co-moulded steel insert that guarantees high durability and perfect torque transmission between the actuator and ball.
