

**1** Electric modulating actuator constructed according to FIP specifications; with plastic shell and standard emergency override. Available with voltages from 12 to 240V with 4-20mA and 0-10V input.

**2** High surface finish stem with double O-Ring. The double connection key system guarantees solid and reliable actuator torque transmission to the ball.

**3** Easy to install **PowerQuick** module for pneumatic or electric actuator fully made of highly robust technopolymer.

**4** The patented ball design provides linear flow regulation throughout its range of operation even when the valve is open just a few degrees and guarantees minimum pressure drops.

**5** Patented **DUAL BLOCK®** system: prevents union nuts from loosening even under extreme operating conditions: e.g. vibration or thermal expansion.
